This workshop is designed to educate and empower preschool teachers to create a more inclusive and supportive learning environment for children with limb differences. Through a combination of an informative session, hands-on activities, and reflective discussions, teachers will gain a deeper understanding of limb differences, how they impact children's development and daily experiences, and how to implement strategies that foster inclusion, acceptance, and empathy in the classroom. This workshop is designed to ensure that all preschool children, including those with limb differences, feel included, supported, and empowered to thrive in their early childhood education experience.

Please note

- All participants must register to attend the training.
- Commitment to the training is important. Please remain present and actively participate. Minimize distractions and keep your screen on.
- All training sessions may be rescheduled or cancelled due to insufficient enrollment.
